Time to Shine!

It's the June Holidays!

(or, at least, for some people)

Congratulations on making it through the first half of the school year! 🎉 Now that the June holidays have started, we finally have an opportunity to relax, recharge, and not have to do so much homework.

The holidays are also a great opportunity to learn a new skill and do what you enjoy. For more information on that, check out some articles below!

So yea, we hope you will enjoy this issue!

Things to do during the June Holidays

During the holidays, it is a great time for us to rest, after the hectic but also joyful school days. Here are some things you could do to make your holiday more enjoyable and meaningful.

1. Spend more time with your family by going on outings such as picnics, watching MBS laser shows, and many more performances! Watching movies, going overseas, having

dinner together... These activities will definitely improve your lifestyle as well as your relationship with your family.

2. Learn new skills during the holidays! What hobbies do you have? Would you like to pursue them? You can excel in many things with a determined mind and resilience. Some examples are: gardening, acting at home, flying a kite, typing skills, and even cooking! Enjoy the process of doing them!

Book of the Month

Instructions by Neil Gaiman

This short story tells us that every journey that we embark on, we will need to remember to have wisdom, values, and always think before we make each step. In this poem, or very short story, it reveals many important things and life skills we should know. Enjoy reading this book, and read between the lines to infer the true meaning of what Neil Gaiman is trying to convey. :)

Quotes of the Month

1. Be True to yourself
2. Trust yourself in order to trust others :)
